

Anna Grace Conover

Full-Stack Web Developer with a drive for creating accessible code. I received a certification from the UCLA coding Bootcamp, where I learned multiple technical skills (including JavaScript, CSS, HTML, mySql, Node, and React) while gaining experience in building projects with teams. Bachelor's Degree in Fine Arts, which brings a unique understanding of collaboration, creativity, and storytelling into the developer world. Work-ethic, focus, and quick-learning are all necessary skills for my degree, and they are an example of the traits I bring into my projects.

Phone Number: 832-330-6225 | Address: Oklahoma City, OK 73116 | Email: anna.grace.conover@gmail.com

Education

UCLA Extension Coding Bootcamp: Certificate of Completion 2020
University of Oklahoma: Bachelor of Fine Arts: Drama 2016

Technical Skills/Languages

JavaScript, React.js, Node.js, HTML, CSS, MySql, MongoDB, Git, JSON

Projects

CookingTogether: github.com/AnnaxGrace/MealPlanner | cooking-together.herokuapp.com/

A comprehensive meal planning website, focusing on meal planning as a team to tackle the issue of the mental load in households.

- Front-end built with JavaScript and jQuery, back-end technologies primarily used are node.js and mySql
- Notable dependencies include passport, nodemailer, and aws (amazon s3)

Self-Care Sidekick: github.com/sharlenemay/personal_pet | [/personal-pet.herokuapp.com/](https://personal-pet.herokuapp.com/)

A habit building website that encourages self-care by also taking care of a digital pet. Addresses the issue of mental-health care by acknowledging people do better when taking care of something else.

- Front-end built with JavaScript, handlebars, jQuery, and CSS, back-end technologies primarily used are node.js and mySql
- Notable libraries include Bootstrap and express

Once Upon an Adventure: github.com/AnnaxGrace/once-upon-an-adventure | onceuponanadventure.herokuapp.com/

An RPG choose-your-own adventure game that focuses on education. As your character fights and makes choices, your story is written. Aims to educate in a fun way – since children are more likely to learn that way.

- Front-end built with react, canvas, and CSS, back-end technologies primarily used are node.js and Mongo
- Notable libraries include Bootstrap and Mongoose

Work Experience

Potholder Café - Server November 2019- April 2020

- Servers were their own registers, so quick computation was a necessity
- Was recommended by both customers and back-of-house staff to managers for both my attitude and ability

Brilliant Earth - Customer Experience Receptionist March 2018 – November 2019

- Worked with Netsuite, Microsoft Office, and other applications. Performed filing, inventory, and shipping tasks.
- Given training responsibilities including product and technical training

Zales - Jewelry Consultant, Keyholder September 2015 – May 2016

- Was recognized for leadership qualities, given higher-level responsibilities and designated keyholder
- Due to my eye for formatting and design, was responsible for designing displays in the store.
